

WORKING TOGETHER FOR LABORATORY ANIMAL SCIENCE AND TECHNOLOGY

Information for Poster Authors

We welcome Poster submissions for AST2020 from Technicians, Vets, Scientists and all those involved with laboratory animal science & technology and look forward to receiving them.

As this meeting is a first time joint venture we felt it would be helpful to issue some guidelines.

Only accepted posters, submitted via the website, will be displayed. There are 3 prizes for posters this year and all posters displayed will be eligible to be judged.

Posters should be size A0, preferably Portrait in orientation but Landscape would also be admissible.

A Poster which has been displayed previously at another meeting may also be accepted

Only Posters covering work conforming to all legal and ethical requirements will be accepted.

Accepted posters will be considered for publication in Animal Technology & Welfare and the LASA forum.

Logos from your place of work, for example University, CRO etc., are permissible in the title banner

To be fair to all our trade partners we ask that company logos or products are not promoted within the body of the poster however mention of the company is acceptable in the acknowledgement section

We also ask that you are in attendance with your poster at certain times, and will be in touch in due course with this information once it has been finalised.

We recommend that you prepare some hand-outs to give to delegates during the poster sessions. We encourage you to share your achievements and contribute with your work and ideas to improving laboratory animal science and welfare worldwide.
